What makes the Canadian Mix investment different than other term investments?

A Market-Linked Guaranteed Investment is an investment into a group of companies that, depending on the success of those businesses during the investment term, can provide you with a return on your initial investment. This has the potential to earn you more than a standard term deposit.

Will investing in this help me reach my financial goals?

This product is great for members who believe strongly in environmentally friendly businesses and wish to see their personal finances grow with like-minded companies. Members who have a savings goal in mind and don't plan on accessing these funds for the next 5 years could benefit from this investment. If you think that 5 years is too long to wait, Conexus offers other investment products to fit your timeline.

What happens if there are market disruptions?

Conexus is able to determine the proper actions to take if the markets do experience periods of upheaval. For instance, if market trading is suspended, Conexus can choose to postpone the start date of the index value of the investment.

What happens when the investment term is due?

Once your investment is due, the cash value at the time will be moved to an account of your choosing. Your advisor will be in touch with you to discuss what you plan on using that money for next.

Can I take my money out of the investment before the term is due?

Conexus is unable to provide an early redemption option for this investment.
